

Downtown Business Owners Request for Reopening Main Street

Dear Ventura City Council Members,

We are respectfully requesting the immediate reopening of Main Street to its pre-pandemic configuration.

While the temporary street closure and modifications were helpful during the pandemic, the current configuration is no longer serving many of the businesses that rely on accessibility, visibility, and consistent customer flow.

We are additionally concerned with the recent announcements of several long term businesses choosing to move or close their shops citing the closure as their main reason.

Reopening Main Street to vehicle traffic would help restore accessibility for customers, improve convenience, and create a more balanced and inclusive environment for retail, dining, and service-based businesses alike.

Downtown Ventura is a vital part of our community, and many of us have invested years—if not decades—into building our businesses here. We are asking for thoughtful, timely action that restores accessibility, improves business conditions and supports the long term health of the entire downtown district by reopening Main Street.

Thank you for your time, consideration, and continued service to our city.

Reopening Main Street to vehicle traffic would help restore accessibility for customers, improve convenience, and create a more balanced and inclusive environment for retail, dining, and service-based businesses alike.

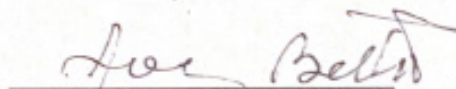

Downtown Ventura is a vital part of our community, and many of us have invested years—if not decades—into building our businesses here. We are asking for thoughtful, timely action that restores accessibility, improves business conditions and supports the long term health of the entire downtown district by reopening Main Street.

Thank you for your time, consideration, and continued service to our city.

Downtown Business Owners Request for Reopening Main Street

Dear Ventura City Council Members,

We are respectfully requesting the immediate reopening of Main Street to its pre-pandemic configuration.

While the temporary street closure and modifications were helpful during the pandemic, the current configuration is no longer serving many of the businesses that rely on accessibility, visibility, and consistent customer flow.

We are additionally concerned with the recent announcements of several long term businesses choosing to move or close their shops citing the closure as their main reason.

Reopening Main Street to vehicle traffic would help restore accessibility for customers, improve convenience, and create a more balanced and inclusive environment for retail, dining, and service-based businesses alike.
